### Software Engineer

#### Ore and Tar

Harare, Zimbabwe

03/2022 - Present

- Led the design and development of an enterprise-level web and mobile application client project, driving tens of thousands of dollars of revenue every quarter using the latest technologies of **AWS, Javascript, React, Supabase, Lambda** and **SQL Databases, Laravel Backend**
- Designed and implemented scalable APIs and background workers for managing first- and third-party proprietary licenses using **Node JS AWS Lambda**, and other **AWS cloud technologies**.
- Led the development of several **B2B** products, from identifying system requirements and partner dependencies to workload balancing, software implementation, engineering, testing, and configuring metrics, alarms, monitors, and dashboards.
- Enriched system metrics by integrating the platforms with telemetry; facilitated in-depth logging by correlating APIs with vector contexts.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing, unit/integration/e2e testing

### Software Development Engineer

#### Project Contracts

Harare, Zimbabwe

04/2020 - 01/2022

- Implemented enterprise applications of Experiment Platforms using **Javascript, React**, AngularJS, AWS, and DynamoDB.
- Implemented and maintained front-end web applications, resulting in a 20% reduction in page load speeds and conversion rates by utilizing modern web technologies such as React.js and best practices for user experience and accessibility.
- Developed and executed front-end development strategies, resulting in a 15% increase in website performance by implementing optimization techniques such as code minification and troubleshooting issues using browser developer tools.
- Worked with cross-functional teams to develop and execute on-time and on-budget projects and initiatives by effectively communicating project timelines, progress, and objectives using tools such as Slack and Zoom.
